

Running Model (Simulation) in OPCAT:

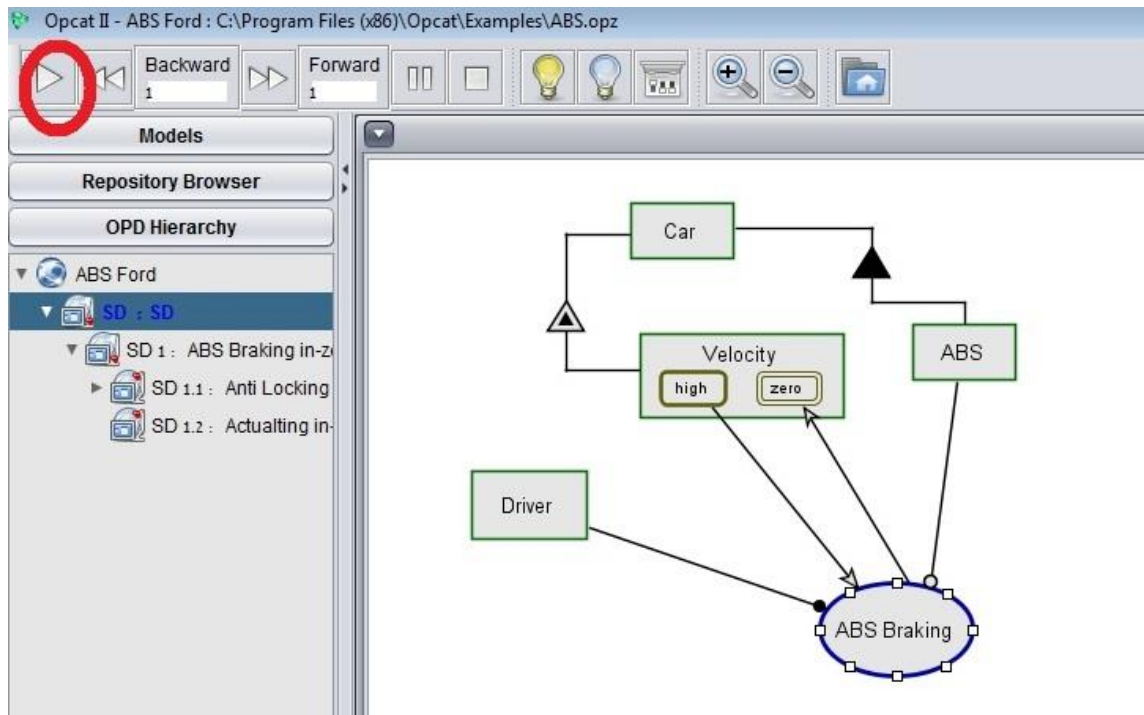

1. Open your model.
2. Click on “Test System” for getting Simulation mode:

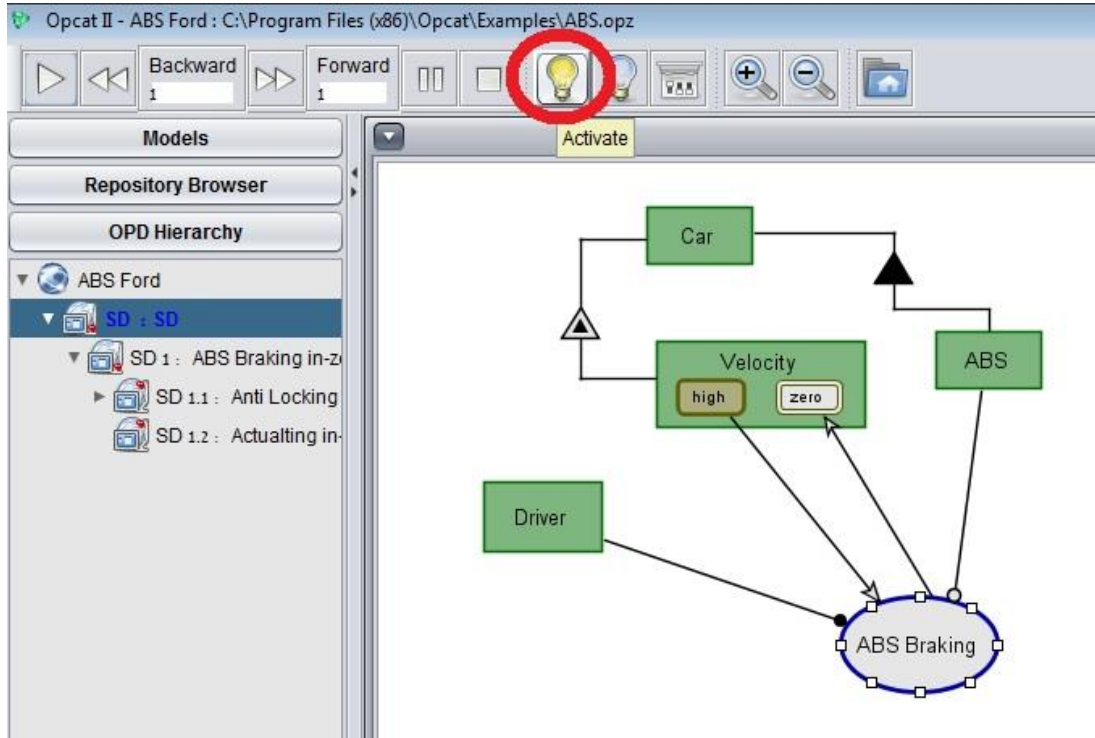

3. Select the main process of your system in SD main
4. Check “Automatic Move Between OPD”

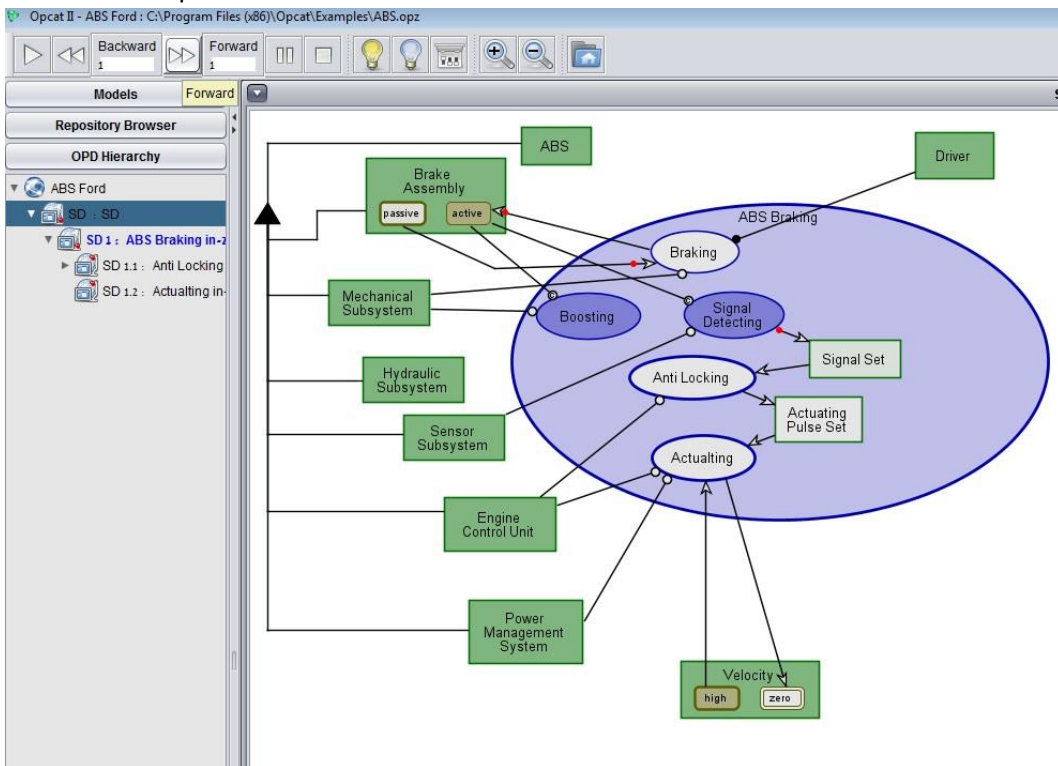

5. Click "PLAY"

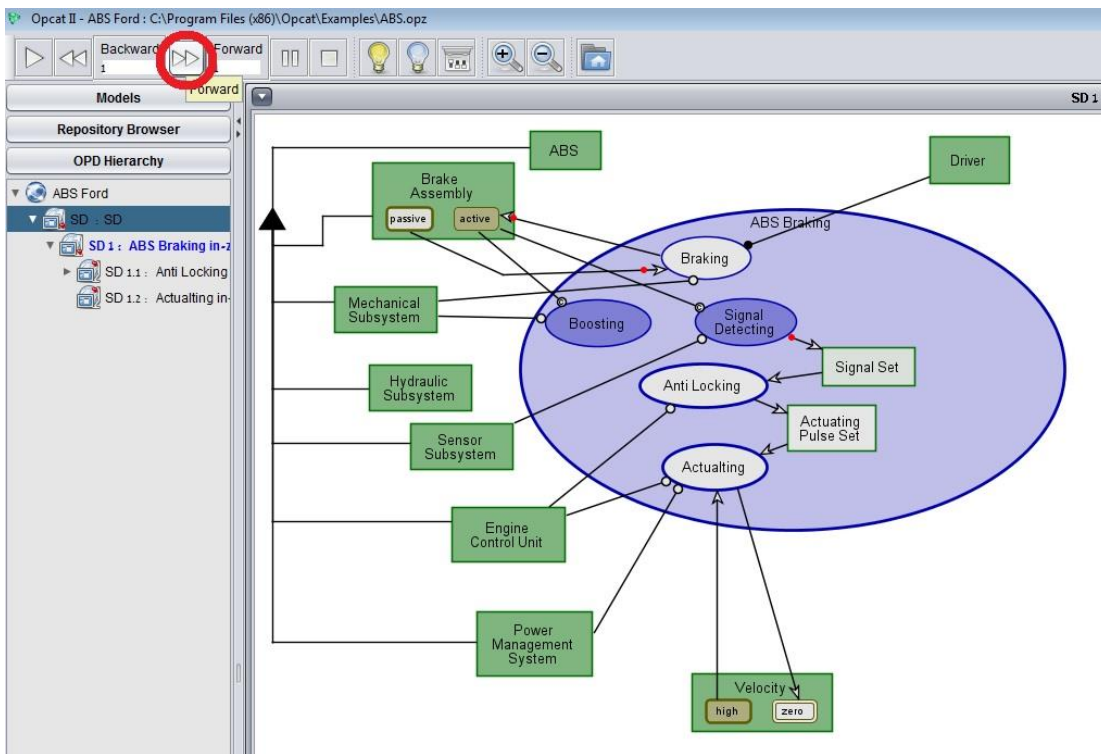

6. Click "ACTIVATE"

7. The simulation starts and you see "red balls" are running between objects and process. It indicates steps of the simulation.

8. Use "FORWARD" for continue

9. You can configure your simulation using "Testing Settings" for continues simulation and etc
